

Hobro Speaker stand

Although it is a universal stand, the Eltax Hobro was specifically designed for the Eltax Monitor III and Monitor III BT compact speakers. Four holes are drilled in its top plate to secure the speaker by putting the spikes in the holes. Thus fixed, the speaker is perfectly stable and the vent located under the speaker is not obstructed. 60 cm high, the Eltax Hobro speaker stand guarantees optimal acoustic experience by placing the speakers at the ideal height. The base is made of four adjustable spikes in order to optimize decoupling. A grommet allows you to hide all cables for perfect speaker integration.

- Specially designed for Monitor III speakers
- Wire path
- Spikes and counter spikes provided
